

EasyBase-Time | iOS Installation

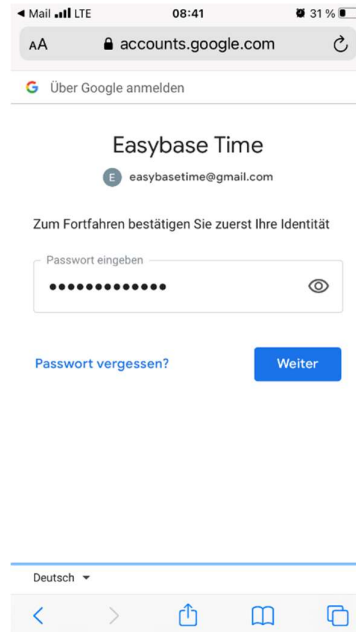

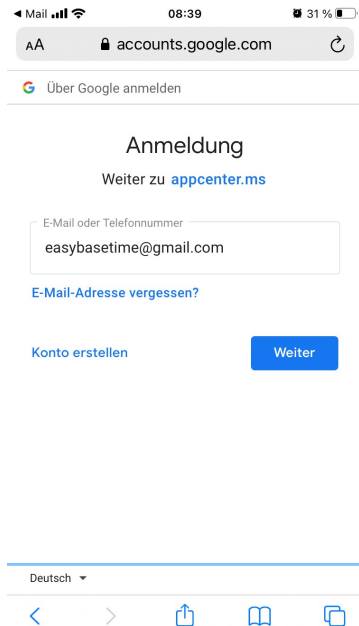

- Please open the installation email on your iOS Device.

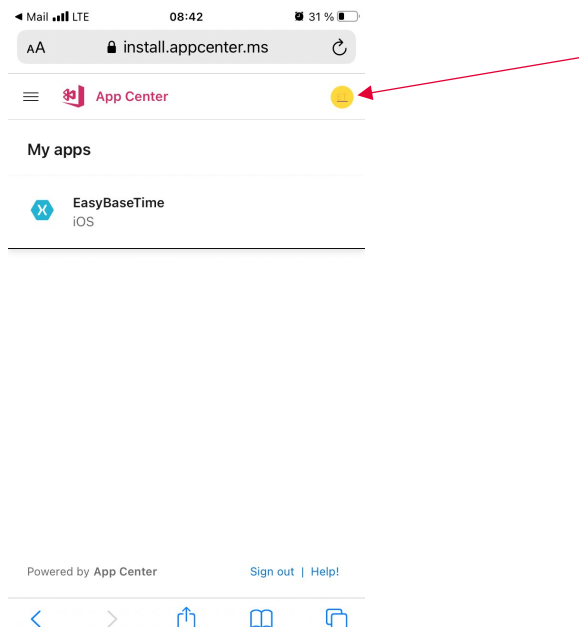

- The App-Center opens. Please click on Google Sign in on the bottom.

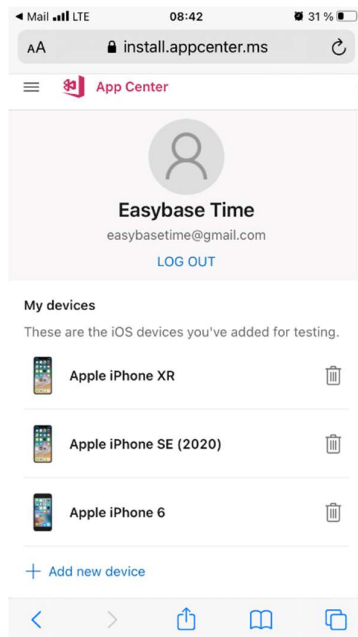

- Please sign in with following credentials:
Email: easybasetime@gmail.com
Password: Easybase123!

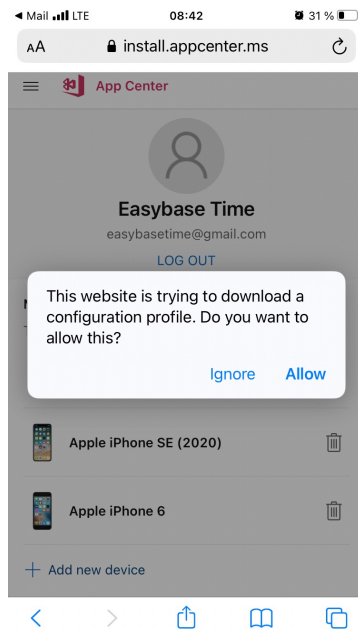

- Click on the icon on the right upper corner (or you are already on the next page)

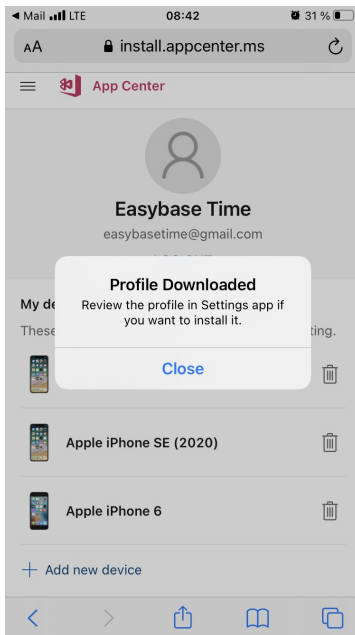

- Click on "add new device".

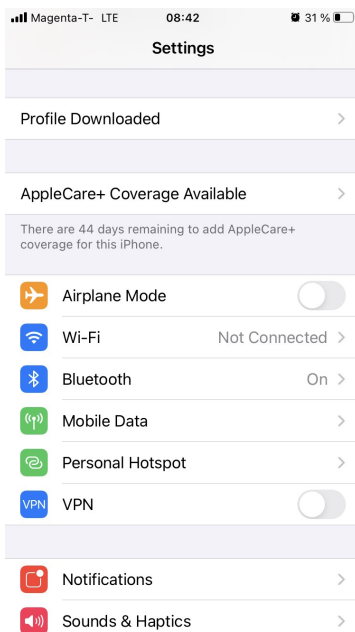

- To download the configuration profile click allow.

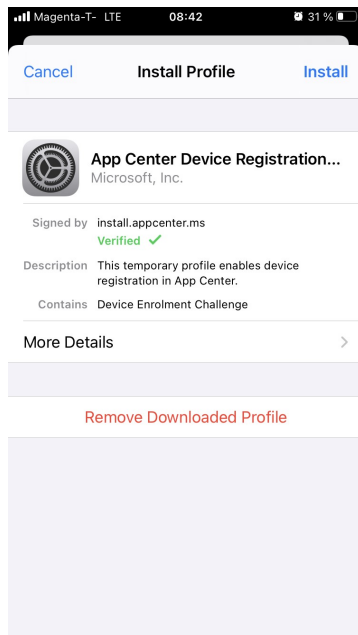

- The configuration profile downloaded successfully. Please go to your system preferences.

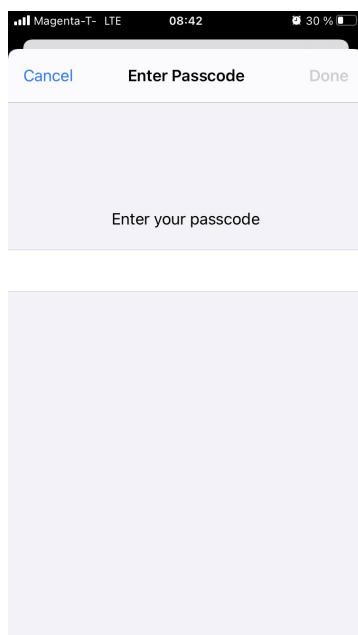

- Under "Profile Downloaded" you find your configuration profile. (If not displayed: Go to "General" -> "Profiles")

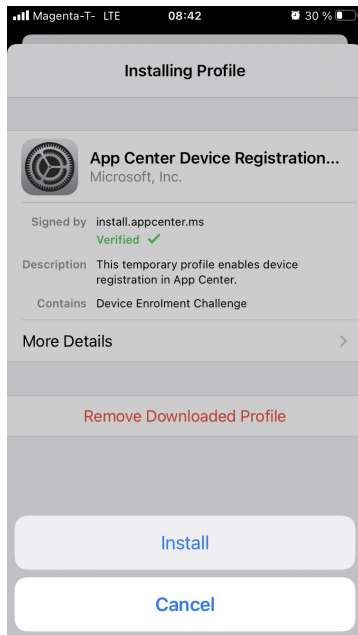

- Click on "Install"

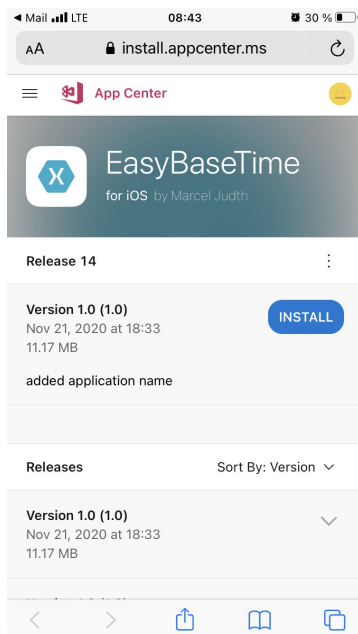

- Enter your passcode from your device.

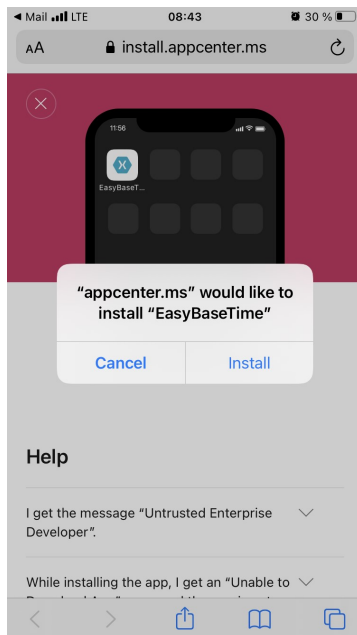

- Click "Install" again. Afterwards you will get redirected to the App-Center Page. Please wait 60 minutes to continue with the last steps.

- After 60 minutes, your device is correctly configured to install EasyBase Time. Please open the installation email again and click on install. You should see following page. Please click on the blue "INSTALL" button.

- Please click "Install" again.

- Finally, your app will be installed. On your home screen you will be able to see the app. Now you can continue with entering your given server key and your employee number.
